— Removing the soil places the shipping of the plants on a mail order basis, and inasmuch as we pay postage to all points of the United States and its possessions, we are willing to prepay the express charges on orders amounting to \$3.00 or more when shipped in this way, except, however, on orders for such plants as Cycas, Palms, Ficus, Azaleas, Araucarias, Camellias, Rhododendrons, Banana Plants, Large Lemons or Other Large Decorative Plants, Dahlias, Caladiums, Peonies, Large Shrubs, Nursery Stock or Vegetable Seeds in Pints and Quarts, and Garden Requisites. If you wish us to ship by express prepaid with soil removed—write Yes.

Begonias, Chrysanthemums, Carnations, Cannas and Ornamental Ferns, Geraniums, Fuchsias, Lilies, mailing size shrubs, hardy Vines, some of the hardy perennials and miscellaneous

Bedding Plants. These plants can be shipped to the most far-away sections of our country with the soil removed and transplanted safely. This offer or special inducement is made therefore mainly to secure orders from these far-away points where express charges are high and form a barrier to ordering. PLEASE READ CAREFULLY the paragraph on reverse side of this sheet relative to methods of shipping plants. Do not fail to notice, also, our guarantee which we place on every order that we ship, no matter when it leaves our establishment.

OUR GUARANTEE

We guarantee all Trees, Shrubs, Plants, Bulbs and Seeds that we send out to be true to name and to reach purchaser in good condition when forwarded by Mail or Express (freight shipments at purchaser's risk), and hold ourselves in readiness to replace all stock that may accidentally prove untrue to label, free of charge, or refund the amount paid therefor, but it is mutually understood and agreed between the purchaser and ourselves that our guarantee of genuineness shall not in any case make us liable for a greater sum than that originally received for such stock that may prove untrue. Most failures with plants, bulbs and seeds are due to soil conditions, unfavorable weather and other causes entirely beyond our control, rendering it impossible to guarantee success, and although we will take all possible care to send only such stock as will, under proper conditions, give satisfactory results, we do not and should not be expected to guarantee our stock to grow, or guarantee results in any way, and we cannot entertain complaints that are not made promptly after receipt of goods.

THIS Catalog, our Silent Salesman, comes to you offering at manufacturers' and growers' prices, the stock of one of the largest plant-producing establishments in the United States, offering something for every garden and everything for some gardens, making it a book that should be consulted by every buyer of Roses, Plants, Bulbs and Seeds. Years of experience in packing plants has resulted in methods which insure their safe arrival, and in the years of our business career our products have found their way into every state and territory, and into many foreign countries. For 40 years we have pleased the flower lovers of America, and the business today in all its departments still remains the property of and is under the direct control of the founders and their sons. Our guarantee of satisfaction is an asset with us and a safe-guard to you, giving absolute security to mail order buyers. We promise you as fine stock as can be grown, a large assortment and good service and

we believe, therefore, that this catalog, which we hope will be found pleasing and helpful, is entitled to the consideration of all buyers. With assurances that all orders and communications shall have our conscientious and careful attention, we solicit a share of your garden wants for the year 1916.

Respectfully yours,

The McFarlane Bros. Company.

IMPORTANT INFORMATION FOR CORRESPONDENTS AND CUSTOMERS

WE RESPECTFULLY CALL ATTENTION TO THE SUGGESTIONS ON THESE PAGES, WHICH, IF FOLLOWED, WILL AID IN THE PROMPT AND SATISFACTORY EXECUTION OF YOUR ORDERS

The Glory of the Garden

It is a common saying that the love of flowers is universal, and considering that the tendency of the age seems to be to subdivide occupations and interests it is not surprising that many of us should find practically all of our leisure time given to the study and cultivation of flowers. The stress of common life finds much relaxation in the flower garden which affords varied interest, exercise and pleasure the year round, and then we find there much encouragement in the work of one's own hands. Not only does personal work make one's garden seem better and more attractive but out of it develops a keen interest in comparison and competition. It is a happy thought for us all that out of the smallest plot of ground one can raise the finest flowers that can be grown.

Comparative Value of Roses

Don't think any Rose too small to do well. The roots of one-year plants being carefully protected in pots, permits of the shipping and successful planting anywhere. Roses of this size are to be recommended for all Rose growing sections. If you wish the largest and best Roses for quick effect, then Roses of the two-year size from 4- or 5-inch pots are to be recommended.

Advantage of Pot Grown Roses

There is another advantage in planting pot-grown Roses; namely, The ball of earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. The pot-grown Rose, therefore, has many advantages over other Roses.

Springfield, Ohio, U. S. A.

It is centrally located, geographically, with three express companies—American, Adams and Wells Fargo—which connect with all others, and has unequalled facilities for receiving and shipping orders.

SHALL WE REMOVE SOIL FROM ROOTS AND SHIP EXPRESS PREPAID? Read these Conditions Carefully

If you wish us to ship by Express, Prepaid, with soil removed, you must give us instructions to do so.

Removing the soil, or ball of earth, from the roots of the plants places the shipping of plants on a mail order basis, and inasmuch as we pay postage to all points of the United States and its possessions, we are willing to prepay the express charges on orders amounting to \$3.00 or more when shipped in this way, except, however, on orders for such plants as Cycas, Palms, Ficus, Azaleas, Araucarias, Camelias, Rhododendrons, Banana Plants, large Lemons or other large decorative plants; Dahlias, Caladiums, Peonies, large Shrubs, Nursery Stock, or vegetable seeds in pints and quarts, and garden requisites. Large plants must be shipped without the roots being disturbed if one is to expect the best results from them. The prepay offer does apply, however, on such plants as Roses, Begonias, Chrysanthemums, Carnations, Cannas, and ornamental Ferns, Geraniums, Fuchsias, Lilies, mailing size Shrubs, hardy vines, some of the hardy perennials and miscellaneous bedding plants. These plants can be shipped to the most far away sections of our country with the soil removed, and transplanted safely.

These can be sent for fractional parts of \$1.00 or when postoffice orders cannot be had, provided two cents in stamps extra are sent with every remittance. None but stamps in perfect order accepted.

"The Rose for every garden of every American home."

"Named in honor of the writer of the Star Spangled Banner."

It should be of considerable interest to all and most gratifying that we should have such a wonderful Rose named in honor of the writer of The Star Spangled Banner. ATTRACTIVE BEDDING Designs for the Lawn

(See illustration in colors, plate opposite page 49.)

The wonderful popularity of summer bedding, or outdoor design planting, for general effect prompts us to offer some special collections for this purpose, and illustrations are given in color to give some idea of resulting effects as well as to give suggestions for planting. The chief merit of bedding is the resulting attractiveness and brightness which completes the picture of the home grounds, and such form of planting is probably the most inexpensive of all for the results secured. For description and price, see page 49.

Suggestions for Growing Roses

When Plants Are Received When plants are received it is well to give careful attention to the protection of the roots until they are planted. Drying of the roots by winds is fatal. Dipping the roots in luke warm water and puddling them, to use a nursery term, that is, dipping them in a thin slushy mud is an advantage and which thoroughly protects the roots from the air. When setting the plants in the ground see that the soil is firmed about them well and protect the plants from the direct rays of the sun for a couple of days. When own root pot plants are purchased, and received with the full ball of earth, protection from the sun is not wholly necessary. Water thoroughly after you have made the planting; then defer watering again until the ground becomes somewhat dry, but do not overlook a slight cultivation of the surface of the soil if the plantings have been made at a time when the sun is hot enough to bake the ground and produce cracks which open the soil and expose the roots to the air.

Planting and Soil In planting Roses in the garden, whether the Roses are hardy or need protection, they must be planted in the right place and in the right manner to secure any degree of success. Roses, because of their oftentimes unsightly appearance when not in bloom, are consigned to out-of-the-way places and corners, and while this is very good they should never be planted where they will be shaded too much. Under trees is no place for them, nor among shrubbery. The best place is in a well-drained part of the garden where they get the sun during the whole morning, as the morning sun during the extreme heat of the summer is not so hot as in the afternoon, and they will not dry out so badly. The Rose, as well as all other plants, must have plenty of sun in order to produce flowers, and this fact should never be lost sight of in planting. Naturally damp, soggy ground should never be selected for planting, a well drained soil being necessary. If the soil is inclined to be poor, the addition of some well-rotted cow or horse manure will be of great benefit. The plants should be set about a foot apart if they are moderately small and proportionately farther apart for larger plants. Hybrid Perpetuals and all hardy Roses, if to be left year after year where they are bedded out, will require at least two feet of room each way. Plants set out with cramped roots never do as well as those having plenty of root room.

Manure The Rose is a very gross feeder, and will consequently require a liberal supply of manure. The best manure is unquestionably farmyard manure, as it supplies all that is necessary for the growth of the plant. In light soils cow or pig manure is much to be preferred, as it is cooler for the roots, and much more lasting than stable manure. In heavy soil, stable manure, with the addition of cow or pig manure—and, if procurable, some leaf soil—is the best, as this helps to lighten the soil and keep it open. In all cases the manure should be well decomposed, as fresh manure will burn the roots. Bone meal is an excellent fertilizer (see page 35).

Pruning The object of pruning Roses is to increase their productive power, and also to help the shapely appearance of the plant. Generally speaking, the work is done in the early spring just before the growing season. All weak and old scraggly growth of years previous should be cut out, and old growth that has bloomed a year or more before. With old-fashioned Roses, such as Harrison's Yellow, etc., which flower on the old wood of previous seasons' growth (similar to the hardy shrubs), the pruning should be done right after the flowering season.

Watering Should spring and summer prove dry syringing of the foliage of the plants and watering of the soil regularly is necessary. The ground around all newly planted Roses should be well saturated once a week. Diluted liquid manure can be used when the plants have become well established.

Insects Insects are divided into two classes. First, the chewing, gnawing and biting insects; and second, sucking insects. Those of the first class eat the foliage or fruits, or gnaw off the stems and flowers of the plant. Whether they are bugs, worms, caterpillars or slugs, they are best destroyed by some poison applied on the surface of their food plants, as Paris Green or Hellebore. If for any reason it is not deemed safe to use these poisons, Pyrethrum (Persian Insect Powder), which you can purchase at your drug store, or tobacco in some form should be used. For those insects classed under the sucking insects, such as Scale, Green and Red Spider and Mealy Bugs, must be killed by insecticides, which are either irritants and which produce death by coming in bodily contact with the pest, or substances that close up the breathing pores and produce suffocation. The best one universal insecticide we know of for all kinds of insects is Nicotinic. See page 35. The Fungoid Diseases that bother Rose Plants are mildew, which shows itself in a white powdery accumulation on the leaves caused by sudden changes of temperature, by watering just before night, by too little water, by extreme dryness, by poor drainage, or a deficiency in plant food. Sulphur Powder or prepared fungicides, the remedy. Black Spot or Leaf Blight, showing itself in black spots is caused by reasons similar to those bringing about mildew. Picking off all affected leaves and spraying with prepared fungicides the remedy.

Winter Protection We have indicated the hardness and blooming season of our Roses in each description as follows: "SUMMER BLOOMING—HARDY WITH PROTECTION," which refers to the Teas and Hybrid Teas, or Monthly Blooming Roses, which will require protection throughout the country excepting in the far Southern states. "HARDY JUNE BLOOMING ROSES," which refers to the Hybrid Perpetual Roses or those which are perfectly hardy and which have the natural June flowering season. "HARDY SUMMER BLOOMING," which covers the class of hardy bedding Roses such as the dwarf bush Ramblers. "HARDY CLIMBING JUNE ROSES," which covers the class of Roses such as the Ramblers, which are perfectly hardy and have the natural June flowering season. It is well, however, to protect all Roses from severe winters. The important point is to keep the ground around the base of the plants dry. The plants should be first covered with rough material of some kind to allow of a circulation of air over the surface of the ground, and this rough covering can be topped with leaves, manure or other coarse material such as will shed the winter storms of rain, sleet and snow. Plants in winter should be kept dry for the same reason that we keep ourselves dry. Remember, there is much more in common, or should be, between animal and plant life than is practically acknowledged by most of those who strive for success in the growing of Roses. One must always remember that both demand for their perfect development a sufficiency of nourishing food and drink, a pure atmosphere, a temperature as equable as possible, careful protection and thorough cleanliness. Let everyone who plants Roses bear this in mind, and we shall find a wonderful improvement in the quality and quantity of the flowers.

Extra Large Three Year Old Roses

HARDY WITH PROTECTION—WILL BLOOM ALL SEASON.

McGregor's Tested Fancy Roses

In this Collection we have grouped together 12 of the finest Garden Roses for summer blooming. They make up a collection of Hybrid Tea Roses, which class is rapidly taking the foremost rank, having been produced by crossing the free flowering Tea Roses with the Hardy June Flowering or Hybrid Perpetual classes. This collection not only combines the free flowering habit of the Tea Rose with the rich and varied colors of the other classes, but also inherits unusual hardiness. The collection shows the wonderful results achieved by the most noted Rose specialists of this country and Europe. Not only does the collection represent all colors known in Roses, but shows many beautiful shades and color combinations not found in the ordinary varieties. We believe the collection to be one of superior merit and especially adapted to our climatic conditions. Each and every variety a perfect gem in its particular color and form.

ROSES OF LATE INTRODUCTION

New
Scotch
Rose

Mrs. Andrew Carnegie

A Sweetly Scented Druschki.
CLAIMED ONE OF THE FINE INTRO-
DUCTIONS OF YEARS.

Hybrid Tea Rose of the summer ever-blooming class requires protection, except in the far Southern states. This new Rose was raised by Messrs. James Cocker & Sons, of Aberdeen, Scotland, and is a cross between Frau Karl Druschki and the old favorite, Niphetos. The introducers claimed it to be the finest introduction for many years, and the finest white Rose in cultivation. The flowers are very large, beautifully formed, and of an aristocratic appearance. The habit of growth is robust, and it is not only an exhibition Rose but a first-class cut-flower variety, and at the same time growing and blooming grandly out of doors. The new Rose has been awarded several gold medals, prizes and certificates, and the Gardener of London, England, has the following to say of this variety: "The new variety of Scotch origin, Mrs. Andrew Carnegie, distinguished itself at the recent Regent's Park Show. In a class for a basket of blooms of any Rose except Hybrid Perpetuals, this Hybrid Tea gained first prize, recent kinds. It is a very large, well-formed flower of Roses. It has fragrance, too, even if this is not par-

and it repeated the performance in a class for nine blooms of new or a creamy-white tint, probably one of the most refined-looking among all particularly pronounced. The strength of the growth is favorable, while the length of the flower stem would point to its becoming most useful as an indoor variety for market blooms. The crowd of visitors around the above exhibits, and the general comments made, would show that the writer is not alone in regarding it as the most attractive Rose that has been raised for many a year." Price, nice plants, 1-yr., 25 cents; 3 for 60 cents; 2-yr., 50 cents; 3 for \$1.25.

THE FAMOUS YELLOW ROSE

Marechal Niel

(Summer blooming, hardy with protection.) The fame of the superb yellow Rose Marechal Niel, with its large, deep, golden-yellow flowers, is world-wide. It is almost universally held to be the finest Rose for indoors or outdoors, where the climate admits of its cultivation. In the North the plant should have careful protection in open ground during the winter. Its magnificent golden-yellow flowers are almost massive in dimensions, and reports from Southern California growers tell of single plants showing one to two thousand blooms at a time. As many as four hundred perfect blossoms have been taken from a single plant within a couple of months. All in all it is one grand Rose. It is of strong growth and beautiful foliage. It is grand in petal, shape, color, fragrance, lasting qualities and size, an extremely free bloomer and flowers throughout the season. Contrary to many Roses, which lose their color after opening, Marechal Niel decidedly improves and takes a deeper yellow after being kept for a day or two. The tea fragrance is strongly present in this Rose. It is a variety which practically stands by itself. Price, strong 1-year plants, own roots, 15 cents each; 6 for 85 cents; 12 for \$1.50, postpaid; nice 2-year plants, 35 cents each, 6 for \$1.50; 12 for \$3.00; extra large pot-grown, on their own roots, at 50 cents and 75 cents.

The introducer describes it as having the most marvelous outstanding qualities and the most wonderful Rose yet introduced. They do not hesitate in stating that it is the finest dark crimson Hybrid Tea Rose. It is an enormous big petaled Rose, much larger than the Melainie Souper, a Rose which it resembles in form, and the beautiful rich color of Louis Van Houtte, only with a more velvety shading upon the inside of the petals. This Rose has been awarded the gold medal of the National Rose Society. Very free blooming, with a perfect habit of growth, suitable for garden, exhibition or forcing purposes. Hardy in all localities. Price, strong one-year-old plants on own roots, 25 cents; two-year-old plants, 50 cents each.

FOUR WONDERFUL CLIMBING ROSES

ALL HAVE BEEN AWARDED SEVERAL MEDALS BY THE HORTICULTURAL SOCIETY OF NEW YORK

The Wonderful Summer-Blooming Rose

Dr. W. Van Fleet

Dr. W. Van Fleet stands at the very head of the climbing roses. Nothing like it has ever before been produced. Its parents are the lovely sea-shell pink rose, Souvenir de Pres. Carnot, and the fast-growing, climbing or trailing pure white memorial rose, Rosa Wichuraiana. The flowers, when open, run four inches and over in diameter — borne constantly from the time the sun shines in the spring until late in the autumn. The color is a very delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center. The flowers are full and double, delicately perfumed. The variety grows vigorously and is immune from mildew and other diseases which often befall roses. Strong 1-year plants on own roots, 20c each, postpaid; 3 for 50c; 6 for 90c; 12 for \$1.50, postpaid. Stronger 2-year plants, 50c each; 3 for \$1.25; 6 for \$2.00; 12 for \$3.75.

McGregor Bros. Co.: The Rose plants which I received from you last spring all did fine in spite of the fact that I had not had much previous experience in Rose culture. It certainly was a marvel to see those climbers climb. Please send me a price list of your Roses, as a number of my friends are anxious to know where they can obtain Rose plants like mine.

MISS M. F., Ohio.

Climbing American Beauty, 20 cents.

The Wonderful Hardy Porch Rose

Climbing American Beauty

Hardy June Blooming. (See illustration.)

Flowers are single, about three inches in diameter and a light pink in color. This Rose is perfectly hardy, has a fine foliage that does not burn with the sun, and its thick, glossy leaves keep on the bush all summer, which gives it a pleasing appearance. Immense blooms measuring three to four inches in diameter; and each one is invariably produced on a separate stem. The color is glowing crimson-red, the real American Beauty color. The foliage is magnificent and is an important feature in climbing roses, for without healthy, leathery foliage any climbing rose is a failure, because it is unsightly. This beautiful rose is absolutely hardy in all localities. Price, nice strong 1-year old plants, 20c each, 3 for 50c, postpaid; 2-year plants, 50 each, 3 for \$1.30.

McGregor Bros. Co.:—The Climbing American Beauty is growing at my own home, "Breeze Hill," and was put just where you see it in the picture. It grew like all possessed. All the growth you see and a good bit more that you do not see has happened since, and this Rose was some sight last June.

J. H. McFARLAND, Pa.

Hybrid Perpetual, or HARDY JUNE ROSES

In shapeliness, color, fragrance, form, grace and beauty the Hybrid Perpetual Roses have no rivals among Roses. They are the Roses for the amateur and for the professional growers; growing anywhere with little care and any soil, and giving the most wonderful blooms.

The Peony Rose CLIO

See Illustration of Flower and Garden.

(Hardy June Blooming.) Raised by Wm. Paul & Sons, celebrated English Rose growers, and was awarded two first-class certificates by the Royal Horticultural Society. Flowers very large, color flesh, shaded in center to rosy-pink. Its perfect hardiness, vigorous growth and freedom of bloom make it most valuable for planting in the Rose gardens, while the large size, exquisite color and delicious fragrance of its flowers—which at perfection are as large as Peonies—make it desirable as a cut flower Rose.

Strong 1-year-old plants, own roots, 20 cents each; 3 for 50 cents; 6 for \$1.00; \$1.75 per dozen; 2-year-old heavy plants, 40 cents each; 6 for \$2.00; \$3.75 per dozen.

Marie Bauman

(Hardy June Blooming.) A crimson-vermilion Rose, suffused with carmine, as exquisite a blossom as can be found among the Roses. The fragrance is delightful and earnest. The plant blooms profusely, with large, full blossoms of high quality. The bush attains moderate size, and the wood is freely covered with thorns that are light red in color. Price, 15 cents each, three for 40 cents, postpaid; two-year-old plants, 35 cents each; three for \$1.00.

Captain Christy

Prince Camille de Rohan

(Hardy June Blooming.) One of the darkest of the roses—blood-red and maroon. The buds and half-opened flowers are darker than the full-blown blossoms, the latter assuming a smoky crimson hue as the petals droop. The fragrance is strong but decidedly pleasant. The plant grows vigorously, with spreading formation and good foliage. Because of its deep color and the plush-like fabric of the blossoms, the Prince Camille de Rohan is a favorite with many rose lovers. Price, 15 cents each, three for 40 cents; two-year plants, 35 cents each, three for \$1.00.

Duchess of Sutherland

The Black Rose

Gloire de L'Exposition de Bruxelles.

Price, strong plants, 20 cents; 2-year-old plants, 40 cents each.

Gloire de L'Exposition de Bruxelles

Hardy June Rose. A velvety crimson rose, with fiery center, conspicuous in any garden, and is considered the largest, sweetest, and best of all hardy roses. The blooms come very freely and are very large and full. The bush

grows lustily, erect and big, and the foliage is handsome. Sizing up this rose from every point it stands without an equal. The extraordinary hardness of the bush and its splendid foliage makes this one of the best Hybrid Perpetual or June Roses, and aside from the loveliness and fragrance of its flowers it can be planted with full assurance of a most generous return for the minimum of care and attention. The rose has been on the market for a number of years, and more and more of them are grown each season. Price, 20 cents each, 3 for 50 cents, postpaid; 2-year-old plants, 40 cents each, 3 for \$1.00.

His Majesty

"Intensely Black Grained Crimson Blooms."

Hardy June Rose. The National Rose Society has set the stamp of approval upon His Majesty by awarding it the Gold Medal. The color is a fine dark crimson, shaded deep vermilion crimson on the edges, frequently overlaid with a rich velvety shading, the whole flower resembling that beautiful color seen in Duchess of Bedford. It is a strong, vigorous grower, carrying its flowers upright; the blooms are full, of great size, having wonderful substance and depth of petal, with high pointed center of the Ideal Exhibition type. When seen at its best this is a noble flower, and is also one of the sweetest perfumed Roses in cultivation. There should be a few of these Roses in every garden. Highly recommended by all who know it. Price, 20 cents each; 3 for 50 cents; 2-year 40 cents each; 3 for \$1.10.

Magna Charta

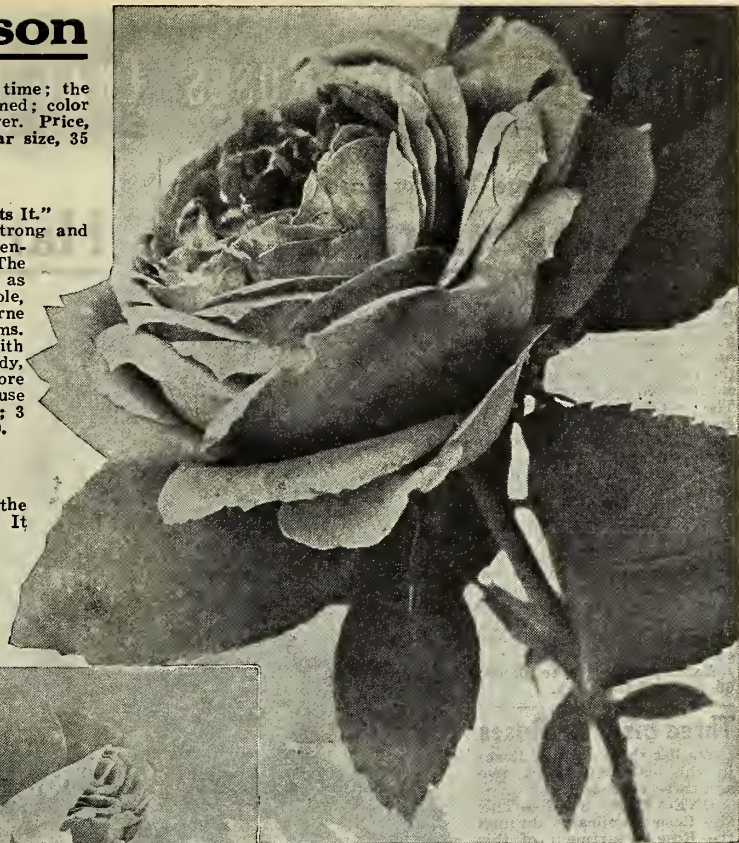

"A Genuine Treat for Everyone Who Plants It."

(Hardy June Blooming.) A wonderfully strong and upright grower, exceedingly vigorous, with splendid and heavy dark bronze-green foliage. The glory of the plant is in its flowers, however, as they are extraordinary in size, full and double, wonderfully fragrant, of great depth, and borne freely from the first year, on long stiff stems. Color, clear rosy-red, beautifully flushed with velvet-crimson. This Rose has proven hardy, even in Canada, and a genuine treat is in store for everyone who plants it. A sure and profuse bloomer. Gloire de Lyonnaise

"Nearest Yellow Hybrid Perpetual."

(Hardy June Blooming.) This grand Rose is the nearest yellow Hybrid Perpetual we have. Paul Neyron

"Among the Foremost Roses of the World."

(Hardy June Blooming.) Paul Neyron enjoys the distinction of producing the largest of Roses. The plant blossoms two or three times a year. The color is clear pink, shading to rose—most beautiful in the massiveness of the blossom. Very fragrant with mild touch of apple blossoms. The Rose is very strong and vigorous and is considered by Rose growers as being among the first six Roses of the world best suited for outdoor planting. Price, 15 cents each; 3 for 40 cents; large 2-year plants, 35 cents each; 3 for \$1.00.

THE DISTINCTLY STRIPED NOVEL AND SHOWY ROSE

Vick's Caprice

(Hardy June Blooming.) This grand novelty is a true Hybrid Perpetual Rose. We esteem this one of its greatest advantages, as it may be grown to perfection by the amateur equally as well as by the professional florist. The flowers are large, ground color soft, satiny-pink, distinctly striped and dashed with carmine. It is beautiful in the bud form, being quite long and pointed, also showing the stripes and markings to great advantage, making a valuable and desirable article for cutting. Price, 20 cents each; 3 for 50 cents; large 2-year plants, 40 cents each; 3 for \$1.00.

Madam Chas. Wood

"Loaded With Flowers All Summer Long."

(Hardy June Blooming.) A vigorous, healthy Rose, of dwarf, branching habit, and is simply loaded with flowers all summer long, being even more profuse than most of the tender "everblooming" Roses. The flowers are large, perfectly double, and of a dazzling scarlet-crimson color, and have the rich, spicy fragrance peculiar to the best Hybrid Roses. Price, 20 cents each; 3 for 50 cents; large 2-year plants, 40 cents each; 3 for \$1.00.

The Massive Rose, Paul Neyron, 1-yr., 15c; 2-yr., 35c.

HARDY YELLOW ROSES THAT GROW ANYWHERE

Orange Yellow Rose Soleil d'Or

Clear Yellow Rose Harrison's Yellow

(Hardy June Blooming.) The flowers of Soleil d'Or make up a wonderful combination of reddish gold, orange yellow, nasturtium red and opaline pink. In a general way the color would be described as rich chrome yellow, shaded coppery rose. The expanded flower is perfectly double, the petals slightly incurved and fully expanded blooms measure three inches or more across. It bears some likeness to the briar type and the foliage is heavy, dense and deep green. The variety is of vigorous growth, growing three to four feet high, branching well and bears quantities of exceptional highly colored flowers as its name implies and when in full bloom is of striking brilliance, and is a variety that should be a part of every garden collection.

Extra strong 2-year plants, 60 cents; 3 for \$1.50.

Three Sizes of Roses

We list three sizes of Roses in this catalogue—one, two and three year sizes.

ONE-YEAR SIZE—This size Rose is indicated through the Rose department of this catalogue as "One-year plants," "nice established plants," "strong young plants," or in similar descriptive terms. These one-year Roses are green house grown, have been well hardened and winter rested.

TWO-YEAR SIZE—These are large pot-grown Roses from 4- or 5-inch pots. Plants with strong vigorous roots and well branched tops. They are of a much larger size than the one-year plants, naturally a little higher priced.

THREE-YEAR SIZE—These Roses are of a selected size, three-year-old, and will be sold from 5- and 6-inch pots. They are heavy plants, well branched and offered as being the best Roses obtainable.

Soleil d'Or, 2-yr., 60c.

(Hardy June Blooming.) A Rose that has been known since we were children is the Yellow Harrison. Color can only be described as being of the purest and clearest yellow. The flowers are semi-double, of medium size, and of pleasing fragrance. The flowers come full in early June and there is no other Rose which bears blooms in greater abundance. The variety grows to height of four or five feet, is of the briar type and is supposed to be a hybrid between the Austrian and Scotch Roses. It is a variety as hardy as shrubbery, will grow anywhere and will always take care of itself. It should not be pruned in the fall as the flowers are borne on young shoots from old wood. Prune immediately after blooming season.

Extra strong 2-year plants, 60 cents; 3 for \$1.50.

McGregor's Fragrant GARDEN Carnations

When the people throughout the country were vainly seeking for an appropriate flower, acceptable to all, as our National Emblem, nature opportunely came to their assistance by presenting the improved Carnation—the product of American soil—which seems especially created for that purpose, uniting the red and white flower with foliage of metallic hue. While it is generally conceded that the Rose ranks first for producing flowers for cutting, the Carnation is gaining in popularity for its profusion of bloom, easy culture, and for the exquisite fragrance of its flowers. The last few years have seen an entirely new Carnation, forming one of the most beautiful and desirable flowers we have, flowering freely during the summer and fall in the garden, and with proper attention and care, giving an abundance of flowers indoors in the winter. We take pride in offering the following collection:

PAINTED LADY—The flowers are full and double, and have a delightful clove fragrance. The color is pure white ground, beautifully striped with bright pink and scarlet—reminding one of the beautiful tints seen in Azaleas and Rhododendrons. 15 cents each; 3 for 40 cents; \$1.50 per dozen.

A Grand New American Introduction.

Two Wonderful New Pelargoniums.

THE NEW PELARGONIUM German Glory

This plant novelty is quite remonant, for florets and clusters are very large. Ground color Cattleya blue, very much like the Cattleya Orchid. The upper petals contain two large magenta distinctly veined. An exceedingly beautiful and exceptional new color in Pelargonium. The plant is of very robust growth. A very desirable variety. Price, 25 cents each; 3 for 65 cents; 6 for \$1.20; \$2.25 per dozen.

THE WONDERFUL PELARGONIUM Gardener's Joy

"As Showy as the Rhododendron."

This variety of Pelargonium is one of the latest introductions. The ground color is apple blossom-pink, the florets are from three to three and one-half inches in diameter, and are joined in enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster. It is of a half-dwarf nature, very sturdy and rapid grower. Price, 25 cents each; 3 for 65 cents; 6 for \$1.20; \$2.25 per dozen.

Pansy Geranium

"Rivals the Pansy in Showiness of Flowers."

Mrs. Loyal—When this new Geranium was introduced to the trade its sterling qualities were at once recognized, and advantage was taken of every opportunity of building up the largest possible stock that the large demand for this novelty might be taken care of. The Mrs. Loyal Pansy Geranium (Pelargonium) bears flowers the markings of which are most extraordinary—also rivaling the Pansy in showiness of flower. The plant is of the easiest growth and is literally covered with flowers all the time. Nice plants, 20 cents each; 3 for 50 cents; \$1.75 per dozen.

Pansy Geranium, Mrs. Loyal, 20 cents.

Everblooming Pelargonium, Easter Greeting.

The Everblooming Pelargonium Easter Greeting

"Rivals the Azalea in Beauty."

This new, everblooming Pelargonium was shown at Mannheim Horticultural Show, planted out as a bedding plant and bloomed continually until late in the fall. Rivals the Azalea in beauty. The following description is from the German introducer, Carl Fraiss: "Easter Greeting is the most wonderful flowering variety of all Pelargoniums. Its blooming season extends from late winter to early fall, and through the summer the plants are gorgeous. The plants in 5-inch pots have produced over a hundred trusses of blooms. The variety is of strong, compact, bushy habit, holding its foliage well. The color is hard to describe—a fiery amaranth red. Some describe it as a brilliant rose. Each of the five petals being marked with a large dark brown or black spot in the center, the spot being bordered with scarlet daintily pencilled with crimson. The combination is very striking and at once catches the eye of the most careless observer. The florets are very large, from 2 1/4 to 3 1/4 inches in diameter and are very durable either on the plant or when cut." Price, 20 cents each.

Ivy Leaved Geraniums

"Especially Adapted for Hanging Baskets and Window Boxes."

Kentia Belmoreana

The Kentia Belmoreana Palm represents the best of the Palm family. It is a native of the Lord Howe Islands, situated a few hundred miles east of Sidney, New South Wales. Here it grows in luxuriance on the mountain slopes. It has the grace and lightness of the Cocos, but robust in growth and heavy in foliage. As a foliage plant it cannot be excelled, withstanding wonderfully dust, changes in atmosphere and neglect. It is not susceptible to insects and is a rapid and graceful grower. Price, nice young plants, 40 cents; larger plants, 60 cents and \$1.50, by express only.

COCOS
WEDDELLIANA

Fan Leaf Palm

(Latania Borbonica.)—This is the typical Palm and is more largely grown than all other varieties combined (possibly excepting the Kentias). Its vigorous, healthy habit and large, glossy green, fan-like leaves commend it to all. Nothing is more satisfactory as a decorative plant than a well-grown specimen of Latania. This is the Palm from which the Chinese Palm Fans are made. Adapted to all decorative purposes within or without doors. Price, nice young plants, 20 cents each; larger plants, 50 cents each; large specimen plants, \$1.25, by express.

Notice

It may be well to state here that young Palms do not fully resemble the illustrations given, as they do not show their character leaves until the second and third year.

Norfolk Island Pine

(Auracaria Excelsa.)

As a decorative plant for the house this is one of the handsomest and most serviceable. It has deep green, feathery foliage, arranged in whorls, rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage is unequalled. Easily grown and highly ornamental. The soil in the pot from top to bottom should be kept evenly moist, but not continually soggy. During the heat of the summer, to keep up the proper growth, the plants should be kept in practically total shade and syringed constantly and not allowed to dry out for any great length of time. Price, nice plants, 12 to 15 inches high, 3 tiers, \$1.00 each; larger plants, 15 to 20 inches high, \$1.25.

Australian Silk Tree

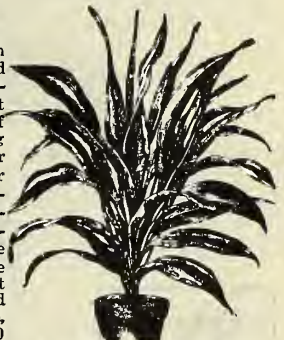

(Grevillea Robusta.)—

A magnificent plant for decorative purposes, of rapid, easy growth, finely cut foliage rivaling a rare fern. The young growing leaves are light brown color, the tips being covered with a soft down, closely resembling raw silk, hence the name, "Silk Oak." Price, nice plants, 15 cents each; 3 for 40 cents; \$1.25 per dozen.

Dracena Terminalis

A superb decorative plant with rich crimson foliage, so marked with carmine-pink and creamy-white flowers that words cannot describe the exquisiteness of colors. It is rapid growing and for home adornment or as a vase plant for outdoor use is indispensable. The Dracena requires greenhouse temperature and must be kept growing and not allowed to become pot bound until they are as large as required; afterwards the plant should be kept up with liquid stimulants. Price, fine plants, 25 cents each; larger plants, 50 cents.

Dracena Terminalis, 25-50c.

India Rubber Plant

(Ficus Elastica.)

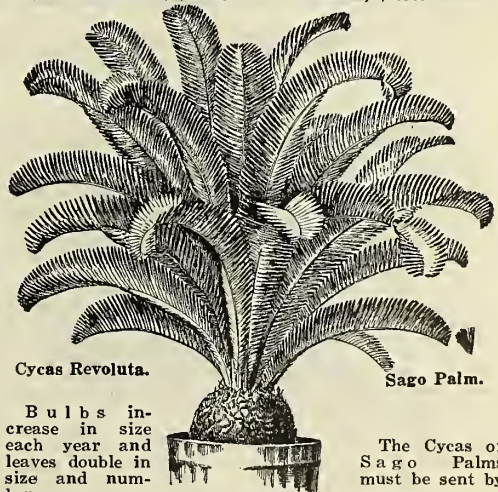

Ficus Elastica, better known all over the country as the rubber plant, is undoubtedly one of the most popular and satisfactory house plants that has ever been distributed. The plant is of tropical nature, being at its best under moist conditions and high temperature, but if well cared for, the foliage kept clean, good drainage provided, and the soil kept sufficiently moist, it will continue growing throughout the year. Branched plants are produced by simply cutting out the top, which should be done in the early spring. The Rubber Plant does not require more than what might be termed good garden soil. Its wonderful thick leathery leaves enable it to stand excessive heat and dryness, while its deep, glossy green foliage always presents a. Adapted to house culture and for porch decoration. 40 cents; larger plants by express, 50 cents.

SAGO PALM

(Cycas Revoluta—Japanese Fern Palm.)—For years the price of the Sago Palm has placed it beyond the reach of ordinary plant buyers. We have imported a fine lot of Cycas from Japan and offer them so as to be within reach of all. It is probably the most valuable decorative Palm grown, both for lawn and house decoration. The heavy, glossy deep green fronds resist alike the gas, dust and changing of temperature to which house plants are frequently exposed. Must be sent by express, too large to mail. Price, nice, small, shapely plants, 75 cents; 6 to 8 leaves, \$1.00 each; 8 to 10 leaves, \$1.50; 10 to 12 leaves, \$2.00.

BEAUTIFUL DECORATIVE FERNS

**Easy to
Grow**

**Immense
Fronds**

These beautiful plants now occupy first place in the esteem of flower lovers. They are unsurpassed for decorative purposes; the fronds are finely cut and oddly shaped. Fronds have a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years.

The Ideal Decorative Plant, the Roosevelt Fern

THE MOST NOTABLE AND VALUABLE NOVELTY INTRODUCED IN MANY YEARS.
CREATES A SENSATION AND WINS HIGHEST PRIZES WHEREVER EXHIBITED.

Probably never in the history of horticulture has a plant been introduced that has received the universal admiration, praise and place that has been accorded the decorative Fern. The popular Boston Fern has had the most phenomenal sale of any decorative plant that has ever grown. The new variety, Roosevelt, is much more attractive than the Boston. The character of its fronds is actually shown in the accompanying illustration, which is from a photograph and therefore a true picture. Fronds grow very broad and heavy, often measuring six inches or more across, and five or six feet long. Owing to the weight of the foliage, the plant assumes an exceedingly massive yet graceful appearance, and owing to the fullness of the fronds, even small plants make much more symmetrical and beautiful plants than the popular Boston Fern. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly, overlapping each other and showing two shades of green, the ends being a light green, while the center and main part of the frond is rich dark green, the contrast producing a beautiful effect.

It is wonderfully valuable, not only on account of its beauty, but also on account of its ease in culture, hardiness and general adaptability. It has all the free-growing, hardy characteristics of the Boston Fern, and, like that plant, is equally suitable for

house culture and a much more beautiful plant for greenhouse and conservatory decoration; in fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable plant than the Boston Fern. Everyone who has seen it is charmed with it. As someone has expressed it, "There is nothing like the Roosevelt Fern in cultivation." In decorative effect it so far outdistances the original variety (the Boston Fern) that there is positively no comparison to be made. We consider it the Most Valuable Novelty That Has Been Introduced in Many Years.

Mrs. H. T. H., Cincinnati, Ohio: "I am glad to state that the Roses sent me last spring bloomed steadily all summer and up until frost."

O. H. L., North Yakima, Wash.: "Just a word to let you know that I received first prize with the Sunburst Rose, received from you last spring."

We offer well established plants at 15 cents each; 3 for 40 cents, postpaid; strong plants, 30 cents each; 3 for 80 cents, postpaid; larger plants, 50 cents each; 3 for \$1.25, postpaid. Specimen plants, 75 cents each; 3 for \$2.00. (The largest sizes of these Decorative Ferns should be sent by express.)

The Ostrich Plume Fern

(*Elegantissima Compacta*)—The fronds grow very broad and heavy, often measuring six inches or more across, and five to six feet long. The plant assumes an exceedingly massive yet graceful appearance. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly. It is wonderfully valuable on account of its easy culture, hardiness and general adaptability. Is especially suitable for the home culture and conservatory decoration. We offer well established plants at 20 cents each; 3 for 50 cents, postpaid; strong plants, 30 cents each; 3 for 80 cents, postpaid; extra strong plants, 50 cents each; 3 for \$1.25.

The Plumed Scotti Fern

(*Nephrolepis Scholzei*)—The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all of the merits of that most popular variety, but with the pinnae subdivided, giving it an airy, feathery appearance. Price, nicely shaped plants, 15 cents; larger sizes, 30 cents and 50 cents, postpaid.

"Teddy Junior"

It is a sport from the now famous Roosevelt Fern. The fronds have an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy" will produce about four times more fronds than any other Fern. It is a compact, vigorous grower, will thrive under most adverse conditions, making an exceptionally rapid growth and producing a plant of rare beauty and perfection without special care or attention. Finest pedestal plant produced. Fine young plants, 20 cents each; larger size, 50 cents.

The Original Boston Fern

(*Nephrolepis Exaltata Bostoniensis*)—This popular Fern has proven a most valuable decorative plant. It is a rapid grower of very easy culture, soon forming a large, graceful plant; its beautiful fronds often attaining a length of five to six feet, which arch and droop gracefully. No plant ever introduced has had a larger sale than the popular "Boston Fern." It is still in large demand. You can make no mistake in ordering a "Boston Fern." Nice young plants, 15c each; larger plants, 25c and 50c each, postpaid.

The Newport Parlor Fern

(*Nephrolepis Scotti*)—It is a condensed form of the Boston Fern with characteristics not evident in the parent, an average plant in an 8-inch pot having 200 fronds. The fronds average about twenty inches and three inches in width at the widest point, being more finished than the parent. Nice young plants, 15 cents each; larger size, 35 cents.

Hardy Ferns for Shady Places

These graceful and universally popular plants are of easy culture and afford a wide range of possibilities. A shady nook, where the soil is moist and the drainage good, will prove an ideal location, especially if a liberal amount of leaf mold or woods earth is available; and better still if rocks and stumps may unite in breaking the monotony of the ground's surface. Under such conditions Ferns require very little attention and amply repay in satisfaction and genuine pleasure. There are many places more or less shut out from the sunlight that may be converted into veritable beauty spots by clumps of Ferns of various kinds, and their intrinsic ornamental qualities are well worthy of our attention. Price, 25 cents each; 3 for 70 cents; 6 for \$1.35; \$2.50 per dozen, by express only.

Hardy Fern, 25c, 6 varieties, \$1.35.

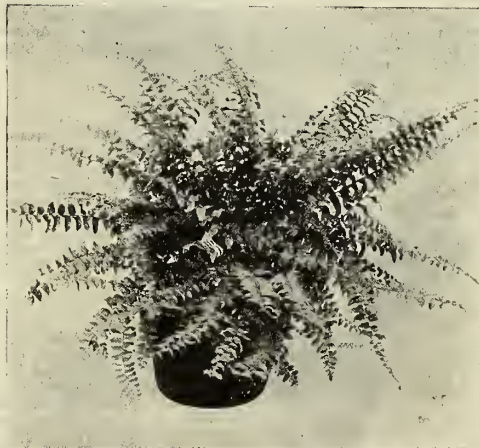

The Ostrich Plume Fern, 20 cents, 30 cents, 50 cents.

The Gold Medal Fern

(*Nephrolepis Whitemanii*)—A great Fern. In fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable and profitable plant than the Boston Fern, which has had the most phenomenal sale of any decorative plant that has ever been grown, but which cannot be compared to the Ostrich Fern for beauty and general effectiveness. In decorative effect it far outdistances the original variety. It has taken gold medals wherever shown. Everyone who has seen it is charmed with it. As someone has expressed it, "There is nothing like the Gold Medal Fern in cultivation." Young plants, 15 cents; strong plants, 35 cents; extra strong plants, 50 cents.

American Wonder Lemon

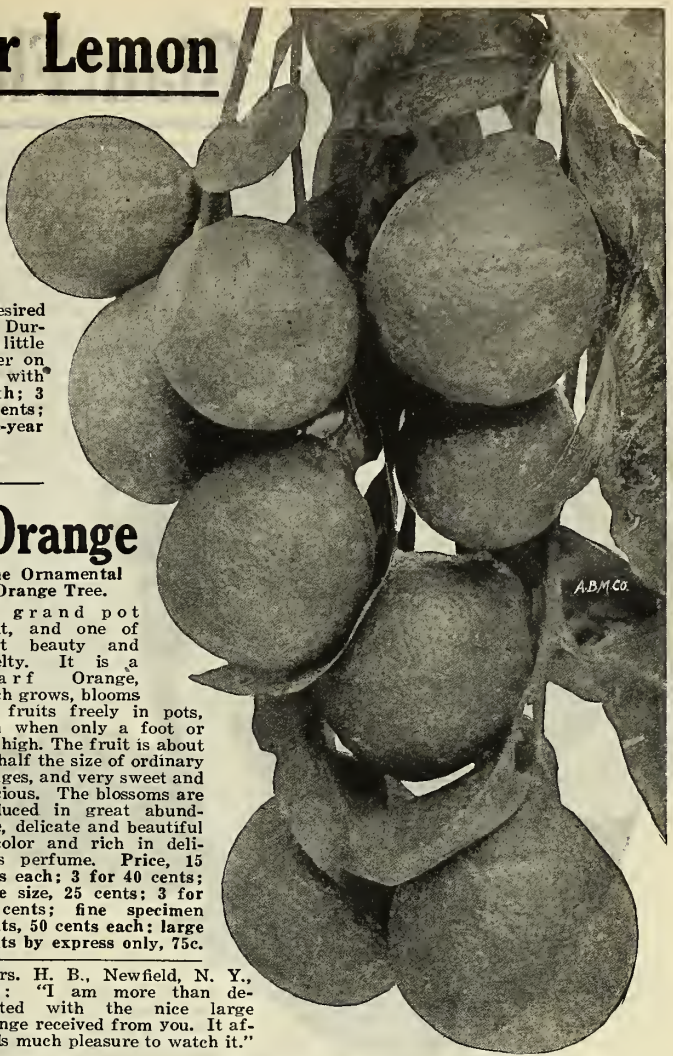

Actual Weight of Fruit Two to Three Pounds.

A true everbearing Lemon. The tree has fruit in all stages of development, from the size of a pea up to the ripe fruit, showing it to be a true everbearer. Fruit weighing over four pounds has been taken from a tree. The American Wonder Lemon far excels the ordinary Lemons for making pies.

The plant is of very easy culture, flowering and fruiting in ordinary good soil. Flowers are fragrant as orange blossoms, which they greatly resemble.

The plant does best under heat and moisture. The growth can be pruned to any size or shape that is desired without affecting its blooming or fruiting qualities. During the winter when the plant makes comparatively little growth the soil or potted plants should be kept rather on the dry side and the leaves and stems sponged weekly with a strong solution of ivory soap. Price, 15 cents each; 3 for 40 cents; larger plants, 25 cents each; 3 for 60 cents; extra large two-year-old plants, 40 cents each; three-year plants, 75 cents, by express only.

Asparagus Plumosus

LACE OR FEATHER FERN—One of the handsomest of our foliage plants. The leaves are bright green, gracefully arched, and as finely woven as the finest silken mesh. Their lasting quality, when cut, is remarkable, retaining their freshness for weeks. Surpassing Maiden Hair Fern in grace, fineness of texture and richness of color. Easily grown as Smilax. The plants trained on trellises or string will run in height to 25 or thirty feet, and for festooning and decorating it is without equal. Price, nice plants, 15 cents each; 3 for 40 cents; large plants, 25 cents each; 3 for 60 cents.

J. S. B., Dumfries, Va.: "The Wonder Lemon received sometime ago, and it certainly is well named. It is a wonder."

Louis Melcher, El Campo, Texas: "How is this for a Lemon Tree? It is the Ponderosa kind. The tree had 128 lemons on and the largest one weighed nearly 3 pounds and measured 17½ inches in circumference. It was bought from you four years ago and stands out in the open in our yard."

Asparagus Sprengerii

(TRAILING BASKET FERN)—When introduced, at a high price, this plant was received with some hesitation as to its desirability, but after only a limited trial it has come forward with such prominence that the supply will be inadequate to the demand for some time to come. Not only is it useful for cutting in sprays for fine cut-flower work, more particularly in connection with large Roses, etc., but grown in suspended pots, it makes one of the prettiest decorative house plants we know of. Price, 15 cents each; 3 for 40 cents; \$1.25 per dozen; large plants, 25 cents each; 3 for 60 cents; \$2.25 per dozen.

Asparagus Sprengerii (Trailing Basket Fern), 15c.

Giant Flowering Pansies

There is no flower more admired than the Pansy; no flower border, be it ever so gay and gorgeous, is so interesting. The combination of colors embraces striped, spotted, bordered and fringed; in rainbow colors, with rich, velvety textures. Pansy plants, planted in the spring as soon as the frost is out of the ground, will begin to bloom at once, and afford daily pleasure. To get best results and extra large flowers, the soil must be extremely rich—we use equal parts well-rotted manure and soil. Price, 25 cents per dozen; 25 for 50 cents; 50 for \$1.00; \$2.00 per hundred.

CHILDREN'S IDEAL FLOWER BED.

The Pansy forms the ideal flowering plant for children. It is their choice flower, easy to grow and always in bloom. 25 cents will buy a Children's Flower Bed.

THE NEW MAMMOTH FLOWERING

Verbena, Jean Telford

This grand new pink bedding Verbena is a sport from one of the novelties of last year. There was a limited number of plants distributed the last spring for propagating purposes only. This new variety, when better known, will help to revive the one time popularity of this bedding plant. Jean Telford is a vigorous growing variety, blooms freely and the flowers are of a beautiful pink color. We recommend it highly. Price, 15 cents each; 3 for 40 cents; 6 for 75 cents; \$1.25 per dozen.

The Modern Mammoth Pansy, Five Times as Large as the Pansy of a Few Years Ago.

The clusters of showy flowers afford constant bloom from June until frost. The plants grow easy and surely and tops which fall over the ground will take root readily. Price, 10 cents each; 3 for 25 cents; 25 for \$1.25. Separate colors of pink, white, variegated, blue, red and crimson, 20 plants for \$1.00, or \$5.00 per hundred.

The Beautiful Chinese Azalea

Azalea Indica—Plant and seed catalogs do not offer anything that will give greater satisfaction than the Chinese Azalea. The plant becomes more popular every season for window and conservatory decoration. The ease with which they can be grown, their diversity of color and their freedom of flowering, will always keep them in favor. They like a sandy compost soil of about half peat and half leaf soil, with an addition of good fibrous loam, and they should have good drainage. Repotting should be done right after the blooming season. Through the summer they should be plunged out of doors in a sheltered spot or planted in well prepared beds, and the plants should be well syringed. The plants should be brought indoors again in the early fall and held in a fairly cool temperature until flowering time. We offer good strong plants of the following: **Mme. C. Petrick**, very early, deep pink; **Md. Van der Cruysen**, pink, semi-double; **Niobe**, very fine, late white; **Empress of India**, salmon bordered white; **Empress of Brazil**, fine light pink. Price, by express only, \$1.25 each.

Plumbagos

PLUMBAGO, CAPENSIS—This variety produces large heads of light blue flowers. Has the most peculiar shade of blue of any flower in cultivation. Always in bloom and an elegant bedder. Price, 15 cents each; 3 for 40 cents; \$1.50 per dozen.

PLUMBAGO, CAPENSIS FLORA ALBA—This is a splendid novelty. The exact counterpart of *Plumbago Capensis*, except in color, which in this beautiful novelty is a clear white. This is one of the leading new plants of the year. Do not confound this with the old worthless white. Price, 15 cents each; 3 for 40 cents; \$1.50 per dozen.

HARDY PLUMBAGO, LADY LARPENT—Grows in compact clumps and from the middle of July until severe frost is covered with lovely, rich violet-blue colored flowers, borne in close terminal heads. Fine for edging walks, beds or borders. (See also page 85.) Price, 15 cents each; 3 for 40 cents; \$1.35 per dozen.

Hardy Creeping Myrtle

A comparatively common yet valuable plant for covering the ground in deepest shade, especially under trees. Hardy anywhere, with shining evergreen foliage and small blue flowers; forms a dense carpet. Thrives best in moist, shaded locations. 15c; three for 40c; \$1.50 per dozen.

Camellia

Japanese Camellia—"Japonica"—This beautiful flower can be grown with success in the North as well as the South. Leaves, glossy green, flowers of exquisite beauty and waxy texture. From pure white to crimson in almost endless variegation, the pure white ones generally prized above the colored varieties. Culture nearly related to that of the Azalea, but their success is more certain. Requires shade and moisture throughout the hot season. Time of blooming is in winter and early spring. Requires a moderate and uniform temperature with as little artificial heat as possible. When set with flower buds great care must be taken in watering. When left too dry the buds are sure to drop. We have a fine assortment of those named below. The plants are quite hardy, and in the Southern States require no protection and very little care. Price, purchaser's selection of colors, \$1.00 each; 3 for \$2.75; 6 for \$5.00. These plants can be sent by express only.

Sweet Olive

(Olea Fragrans)—The *Olea Fragrans* is a fragrant house plant, similar to *Camellia*, and bears small clusters of delicate white flowers in great profusion during the fall and winter. Almost a continuous bloomer. Highly odoriferous both in foliage and flowers. The perfume of a single plant is sufficient to fill a conservatory or room. Nice plants at 35 cents and 50 cents.

Crotons, 20c.
3 kinds for 50c.

FREE

Do not overlook our free offers of Roses, on pages 4 and 5, for orders from new customers.

Crotons

The Croton is practically as easily grown as the Coleus, while the foliage is much brighter. The plants produce charming combinations of colors ranging from almost pure white to light and deep yellow, pink, red and crimson, and the foliage is handsome and odd and of the most brilliant coloring. The Croton makes a beautiful specimen plant and their beauty is enhanced when used in jardinières of appropriate color. They are very effective as exhibition plants and may be grown to large specimens. In the smaller sizes they are used as table plants, and are also very attractive for vases and for window boxes. The Croton is particularly valuable as a bedding plant, and in clumps or masses the combination of rich colorings is not excelled by any bedding plant we have. Planting should be made in full sun and in a good rich soil. Strong plants, 20 cents each; 3 distinct kinds, 50 cents, postpaid; \$1.75 per dozen.

Crape Myrtle

(Lagerstroemia Indica)—A favorite tub plant in this latitude, though not hardy enough to preserve its old wood during the winter, as in the South, where it is perfectly hardy. In the North it dies down to the root, but comes up again in the spring. The best way, therefore, is to keep the plants in the cellar over winter and transplant in rich soil early in the spring, watering freely during the summer, and no flower will produce better effect.

CRAPE MYRTLE, CRIMSON—The old crimson variety. Price, 15 cents; 3 for 40 cents; \$1.50 per dozen.

CRAPE MYRTLE, PINK—Colored a fine shade of pink. Price, 15 cents; 3 for 40 cents; \$1.50 per dozen.

Sansevieria

Snake Plant—A new decorative house or porch plant of great value. There is scarcely a decorative plant listed that is more striking in foliage and habit than this, and certainly none other stands as much downright neglect and hardship. Nothing but frost or continued drenching with water has terrors for it. It will stand gas and dust, and will go for months without a drop of water, yet remain as thrifty as ever. Singularly beautiful, as well as easily grown. Propagated easily and simply by division of the roots. Price, 15 cents each; 3 for 40 cents; \$1.25 per dozen, postpaid; larger size, by express only, 35 cents each; 3 for 75 cents; \$2.50 per dozen.

Watermelon Begonia

Peperomia Variegata—A most beautiful ornamental plant from the Sandwich Islands. Excellent for house, window or table. The leaves are distinctly variegated white and green, thick and waxy-like and have the appearance of being powdered with frosted silver. The fleshy leaves enable them to withstand the dry air of living rooms much better than the great majority of plants. While primarily green-house plants, they do well under irregular temperature without damage. The Watermelon Begonia requires shade in the summer, but should be given full sun in the winter and less water than the majority of plants. They should not be kept overwatered. A loose soil provided with good drainage places them at their best. Price, 15 cents each; 3 for 40 cents; \$1.50 per dozen; larger plants. 25 cents each; 3 for 60 cents.

Royal Purple Plant, 15 cents.

Strobilanthes Dyerianus—An ornamental foliage bedding plant that will undoubtedly become universally popular on account of its brilliant and exquisite coloring, its extraordinary easy growth and usefulness as a decorative plant. Summer Flowering Callas

PLANTING INSTRUCTIONS—The varieties offered below succeed best when treated in same manner as Gladiolas, Tuberoses and other summer-flowering bulbs. They should be planted in the open border in a dormant condition when danger from frost is over in spring, and will then flower during the summer months. When the tops are killed by frost in the autumn dig and store through the winter as you would potatoes. Callas do equally well in pots. Supply drainage, fill base pot with well rotted manure and fairly light soil. When bulbs have been well started into growth give them a good mulch.

The planting of shrubs is an important feature in the adornment of any grounds. They may be planted individually or collectively, and but few of them are really required to add to the beauty and value of property, and at the same time contribute to the pleasure and interest of the home. Probably the most effective arrangement of shrubs is irregular groups or arranged against buildings, fences or property lines or as planting long walks or drives. In the list of shrubs which follow one will find the varieties adapted to a wider range of conditions and arrangement. Our collection is a practical one and the plants we offer healthy and vigorous.

Hydrangea Arborescens Grandiflora Alba

(Hills of Snow.)

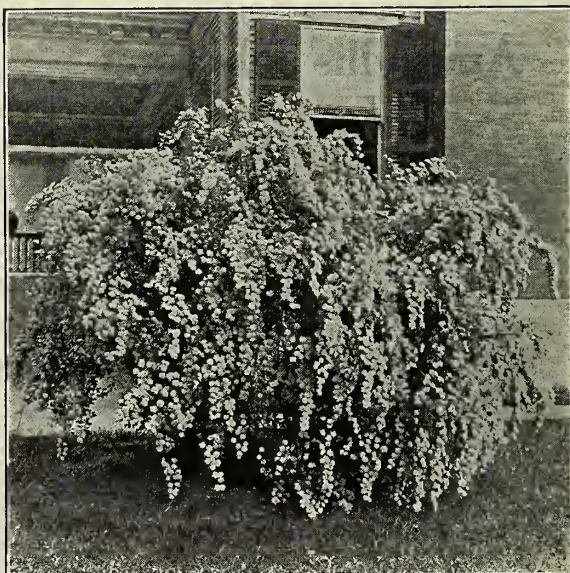

(Four to eight feet.) This beautiful hardy American shrub is the finest addition to this class of plants found in many years. The blooms are very large, of pure snow-white color, resembling a little the hardy shrub so well known, the Snowball, in color and make-up, only they are much larger in size and much more striking. One of its most valuable features is its coming into bloom just after the passing of all the early spring shrubs, while its long season of bloom, from early in June through August, renders it a valuable plant not only to the florist, but to the owner of every garden. It is perfectly hardy, standing twenty degrees below zero. Price, nice young plants, 15 cents each; 3 for 40 cents; \$1.50 per dozen; strong plants, 25 cents each; 3 for 60 cents; \$2.40 per dozen; strong field grown plants, two and three years old, 50 cents and \$1.00 each, by express only. This is the finest flowering shrub for cemetery planting we know of. See illustration. Nice plants, 15 cents each; 2 for 25 cents; \$1.40 per dozen; large plants, 25 cents; 3 for 60 cents; \$2.40 per dozen; large field-grown plants, 50 cents each; 3 for \$1.15; \$3.75 per dozen.

THE SENSATIONAL DECIDUOUS SHRUB, BUDDLEYA VARIABILIS MAGNIFICA

THE EVER-BLOOMING Butterfly Bush

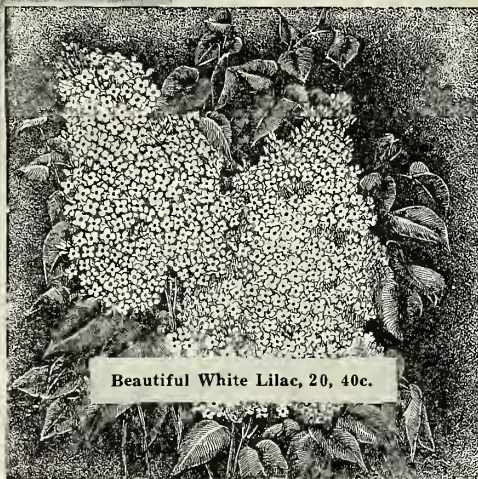

or Summer Lilac

FREE FLOWERING.

BLOOMS ALL SUMMER.

The Buddleya or Everblooming Butterfly Bush was one of the show plants of the San Francisco and San Diego expositions. It attracted unusual attention and was greatly admired by thousands. The Buddleya is a deciduous bush dying down in the winter. In the spring the top should be cut off quite close to the ground when the plant starts to make a new growth from the crowns in a manner similar to the Desmodium. The blooms come from the new wood produced through the summer. Buddleya is one of the most valuable plants either for border or specimen planting, blooming as it does late in the season, and continuing in bloom from the latter part of June until nipped by the frost. It is very rapid growing, and two years will make a large spreading bush, four to six feet high. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently 10 inches long. A single plant the first season will throw out as many as 50 flower spikes, which increase greatly in number during succeeding years. We recommend covering the roots with manure, leaves or other suitable material as winter approaches. Nice 1-year-old plants, 20 cents each; 3 for 50 cents; \$1.75 per dozen; strong 3-year heavy plants, 50 cents each; 3 for \$1.25; \$4.50 per dozen.

One delighted admirer in commenting on the Butterfly Bush wrote: "The Butterfly Bushes are wonders. I wish you could see them. Five feet high and full of handsome flowers. All who see them praise their beauty and free flowing qualities."

climbing flowering plants we grow. The plant is of strong, rapid growth, with small, dense, cheerful green foliage, giving it an elegance possessed by no other hardy climber, and even did it not flower at all, it would be one of our most desirable vines. The flowers, appear in greatest profusion during August and continue late in the fall, are a creamy-white color, and most deliciously fragrant, will grow anywhere. The accompanying illustration is from a photograph and gives a very good idea of its great beauty when in bloom.

McGregor's Selected Flower Seeds

We have used the greatest care in obtaining our Flower Seed, and those we offer are absolutely fresh, being grown by most skilled American growers or imported from the best foreign seed growers. Failure in getting satisfactory results from seeds planted may be attributed to the manner in which the seed is sown rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, to secure blooms before frost, sow in shallow wooden boxes, in good garden soil. Cover seeds very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be taken in watering seedlings well after planting and to protect from the sun for a few days with light paper.

Flowers from seed are usually known as annuals, biennials and perennials.

Annuals bloom and ripen seed the first year, and then perish.

Biennials do not generally flower the first year, and are in perfection only one year.

Perennials continue to flower several years in succession. Many of them bloom the first year if sown early.

General List

A WORD TO OUR CUSTOMERS

It has always been our aim to furnish our customers with seeds of the highest quality. Therefore it is our custom to obtain seeds from whatever part of the world each variety matures in the highest state of perfection.

Our own country produces many kinds of flower seeds which are more recommendable for home planting; such as Asters, Sweet Peas, etc., than the seed grown in foreign countries. Whereas large quantities of flower seeds come each year from Germany, France, England, Holland and Italy, grown by experts who have improved the varieties beyond the best efforts of American growers, due to climate, soil, etc.

Our orders for European grown seed for the crop harvested in the fall of 1915 were placed with the best growers many months before the seed was ripe, and we were assured of their best efforts to fill all our orders. But the deplorable European war has made labor scarce, and shipping facilities meager. So that as this catalogue goes to press not all of the seed has arrived at our seed-houses. Should we not be able to furnish a few varieties of seed herein listed during the first two months of 1916 we trust our customers will have patience, and feel assured we are doing our utmost to serve them promptly, and that the failure to do so is beyond our control.

Yours to serve, THE McGREGOR BROS. CO.

CHOICE FRUITS AND FRUIT TREES

**McGREGOR'S
EARLIEST
STRAWBERRY,**
30c per dozen.

Prices on Nursery Stock are placed low and we cannot allow premiums on orders for Fruits or Fruit Trees.

The trees offered are young and thrifty and will make a very rapid growth and bear quickly. When fruit trees or shrubs are received, before they can be planted they may be safely kept a reasonable length of time by having the roots packed in boxes of moist soil and stored in a cool cellar or shed. It is important to order fruits early, that they may be planted out before the foliage starts.

When offered by mail, postage is paid by us; if by express or freight, charges are to be paid by purchaser; but larger stock will be sent.

SPECIAL NOTICE—As our Nursery is a separate and distinct department from our Greenhouses, it is necessary that all nursery stock be shipped direct from the Nursery.
